

SHRU THE INTELLIGENT CAT COMPANION™

Congrats on your new family member!

- 1 Attach SHRU's replaceable tail feather to immediately increase cuteness. Place tail feather into tail feather hole and rotate to lock in place. See Figure 1.
- 2 Remove dust cover; plug in mini USB cable and connect the USB cable to your laptop to charge. Make sure your laptop is connected to a power source. **Leave SHRU plugged in for at least 1 hour to fully charge.**
- 3 Go to getshru.com/app to download SHRUPlay. Follow the instructions for installation.
- 4 Configure SHRU using the SHRUPlay interface. When you're done, click 'SAVE'. **Scaredy Mode is recommended for the first few play sessions, so your cat can become familiar with SHRU.**
- 5 When SHRU is fully charged, replace the dust cover to protect the mini USB port.
- 6 Turn SHRU on by placing your finger at the silver touch pad for 1-2 seconds. See Figure 2. SHRU will make a sound to let you know it's been turned on. Hint: When you're ready to turn SHRU off, simply place your finger at the touch pad for 1-2 seconds.

What do I do when SHRU's battery dies?

Simply plug SHRU into a computer using the mini USB cord. Ensure your computer is connected to a power source and is not in sleep mode. Allow SHRU to charge for 1 hour before resuming play.

My cat has been drooling on SHRU. How do I clean it?

To care for SHRU, wash gently with a damp towel and mild soap, avoiding the mini USB port and the tail feather hole. Do not submerge SHRU in water.

I want to change the settings. How do I do this?

To change SHRU's settings at any point, simply plug SHRU into your computer, open the SHRUPlay interface, select the desired settings and select "Save".

My cat looks really cute when s/he plays with SHRU. Where can I send you a photo and video?

We would love these! Please send us the files and/or links by e-mail to cute@pdxpetdesign.com and let us know if it's okay for us to share them online.

Still have questions? We're here to help. E-mail us at support@pdxpetdesign.com.

Use SHRU during supervised play; if your cat tries to chew on the tail feather, detach the tail feather. This toy is not intended for use by dogs or children. SHRU is designed by cat fanatics in Portland, OR and made in China. Copyright PDX Pet Design LLC. Patent pending. See getshru.com/patents

DUST COVER /
MINI USB PORT

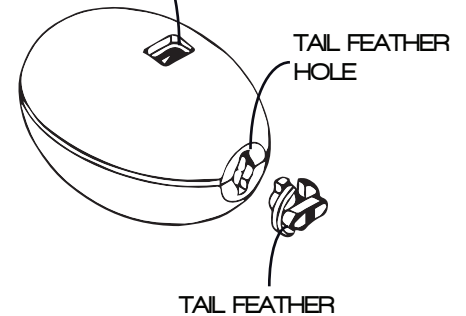

Figure 1: SHRU includes a mini USB port for charging. SHRU's mini USB port is covered by a dust cover when shipped; remove the dust cover to access the mini USB port.

TOUCH PAD

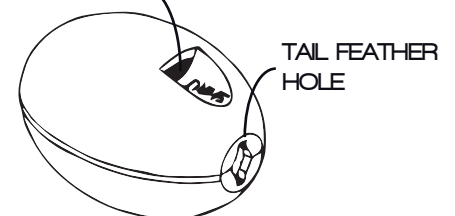

Figure 2: SHRU's touch pad enables you to turn SHRU on and off with a quick touch of your finger. Do not hold the touch pad for longer than 5 consecutive seconds.
